Professional Summary

Innovative Front-End Developer with expertise in building **responsive, scalable web applications**. Skilled in **React.js, JavaScript, Node.js, Firebase**, and UI/UX principles. Passionate about enhancing user experiences and optimizing web performance.

Technical Skills

Languages: JavaScript, C++, HTML, CSS, Python

Frameworks: React.js, Express.js, Node.js, Bootstrap, Material-UI, Tailwind CSS

Databases: MongoDB, NoSQL, Firebase

Tools: Git, GitHub, Figma, VSCode, Webpack, NPM

Work Experience

Relu consultancy

Front-End Engineer

April 2025 – June 2025

- Built responsive user interfaces with React.js, crafting clean, reusable components and managing state using hooks and tools.
- Implemented **React.js best practices** for better UX and component reusability.
- Styled UI with Tailwind CSS, streamlining development with utility-first classes and ensuring pixel-perfect responsiveness across devices.
- Implemented business logic in JavaScript (ES6+), ensuring maintainable, performant code that adhered to best-practice architectures.

Afame Technologies

Front-End Development Intern

Nov 2024 – Dec 2024

- Developed and optimized **responsive UI components**, reducing load times by **15%**.
- Implemented **React.js best practices** for better UX and component reusability.
- Ensured **cross-browser compatibility** and mobile responsiveness.
- Integrated **RESTful APIs** to streamline data communication.

Samsung Innovation Campus (ESSCI)

IoT Intern

Apr 2023 – Jun 2023

- Worked on **IoT architecture, microcontrollers (8051, Raspberry Pi)**, and communication protocols.
- Developed a prototype utilizing motion and humidity sensors **for real-time environmental monitoring**.
- Strengthened problem-solving and time management skills while working on IoT-based solutions

Education

Guru Tegh Bahadur Institute of Technology (GGSIPTU)

B.Tech in Electronics & Communication, CGPA: 8.25

Jul 2020 – Jul 2024

Arunodaya Public School

XII - Science Stream, Percentage: 75.4%

Mar 2019 – Mar 2020

Projects

Where in the World (Link): React.js, REST API, Vite, CSS - • Developed a web application that provides organized information about different countries. • Used REST Countries API to fetch real-time data asynchronously. • Implemented a search and filter feature allowing users to find countries by name or continent. • Built using Vite for fast development with Hot Module Replacement (HMR).

News App (Link): React.js, NewsAPI, Bootstrap - • Developed a real-time news aggregation web app using React.js and NewsAPI. • Implemented infinite scrolling and a search filter to enhance user experience. • Optimized API calls, reducing response time by 30% .

Contact App (Link): React.js, Firebase, Material-UI, Formik - Built a full-stack contact management system with Firebase for real-time database storage. • Implemented CRUD operations for seamless contact organization. • Enhanced security by implementing Firebase authentication.

Code Editor (Link): JavaScript, HTML, CSS - Developed a web-based code editor supporting HTML, CSS, and JavaScript. • Integrated syntax highlighting, auto-suggestions, and real-time preview to improve the developer experience. • Optimized performance, reducing code execution time by 20%.

Certifications

- : **Front-End Development** – Coding Ninjas Certificate
- : **React.js Development** – Coding Ninjas Certificate
